### HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-29 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With respect to claim 1, the prior art of record fails to teach or suggest in combination the claimed limitations of " wherein the radar detection circuit: detects incoming pulses and produces pulse data to a FIFO; generates a table of pulse data for a series of pulses; evaluates the pulse data within the table to remove pulse data for pulses that do not satisfy specified radar pulse characteristics; groups a plurality of pulse data within the table into groups of a specified size; performs radar detection processing; and wherein the baseband processor inhibits transmission of signals in overlapping frequency bands whenever a radar signal has been detected"

All dependent claims are allowable for the same reason stated above.

With respect to claim 11, the prior art of record fails to teach or suggest in combination the claimed limitations of " wherein the processor determines whether the radar signal has been received and, if so, inhibits transmissions on overlapping frequency bands; wherein the radar detection circuit: detects incoming pulses and produces pulse data to a FIFO; generates a table of pulse data for a series of pulses; wherein the processor determines whether the radar signal has been received and, if so, inhibits transmissions on overlapping frequency bands; wherein the radar detection

circuit: detects incoming pulses and produces pulse data to a FIFO; generates a table of pulse data for a series of pulses; evaluates the pulse data within the table to remove pulse data that does not satisfy radar pulse characteristics; groups a plurality of pulse data within the table into groups of a specified size; performs radar detection processing; and wherein the radar detection circuit counts and determines a number of most common pulse interval values and determines a radar signal is present if the number of most common pulse interval values is greater than or equal to a specified number. evaluates the pulse data within the table to remove pulse data that does not satisfy radar pulse characteristics; groups a plurality of pulse data within the table into groups of a specified size; performs radar detection processing; and wherein the radar detection circuit counts and determines a number of most common pulse interval values and determines a radar signal is present if the number of most common pulse interval values is greater than or equal to a specified number".

All dependent claims from claim 11 are allowable for the same reason stated above.

With respect to claim 17, the prior art of record fails to teach or suggest in combination the claimed limitations of " wherein the radar detection circuit: detects incoming pulses and produces pulse data to a FIFO; generates a table of pulse data for a series of pulses; evaluates the pulse data within the table to remove pulse data that does not satisfy radar pulse characteristics; groups a plurality of pulse data within the table into groups of a specified size; wherein the radar detection circuit counts

and determines a number of most common pulse interval values and determines a radar pulse is present if the number of most common pulse interval values is greater than or equal to a specified number; and wherein the baseband processor is coupled to and receives rise time, fall time, and magnitude levels of received signals from the threshold comparison state machine, and determines whether the radar signal has been received and, if so, inhibits transmissions on overlapping frequency bands" .

All dependent claims from claim 17 are allowable for the same reason as indicated above.

With respect to claim 26, the prior art of record fails to teach or suggest in combination the claimed limitations of "generating a power indication of the ingoing digital signal and adjusting a magnitude of the power indication; grouping a plurality of pulse data entries detected in the ingoing digital signal based on the magnitude adjusted power indications; generating a first list of pulse repetition intervals having pulses with a pulse width within a specified range; counting a number of most and second most common pulse interval values; determining whether a radar signal is present; and if a radar signal is present, inhibiting transmission of outgoing communication signals from the radio transceiver in overlapping frequency bands of the radar signal".

All dependent claims from 26 are allowable for the same reason above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
